ABSTRACT

In 1975, from the 321 public high schools, there were 42,975 graduates, or 68.4% of the 62,822 ninth grade enrollment in 1971-72. From the 59 non-public high schools, there were 3,277 graduates, or 83.4% of the 3,930 ninth grade enrollment in 1971-72. This report provides data on the holding power and graduates of Kentucky public and non-public high schools. An overview of the growth from 1963 to 1975 is presented along with a comparison of the 1975 class with the 1963 class. Data were obtained from: the principal's annual report, the superintendent's end-of-year report, and the Bureau of Instruction annual publication "Kentucky High Schools". Tabular data are presented on: the number and size of public and non-public school graduating classes in 1962-63 as compared with the current year, 1974-75; the 10 graduating classes of public, non-public, and combined high schools from 1966 to 1975; the number and whereabouts of 1975 graduates of all public and non-public high schools by region, county, and school district; the total ninth grade enrollment, all public and non-public graduates, and total graduates to college by county and region; the survival rates and whereabouts of public and non-public school graduates for 10 graduating classes, 1966-75 inclusive; and the growth of the total secondary program in Kentucky, all high schools combined. KENTUCKY DEPARTMENT OF EDUCATION
Frankfort, Kentucky

1976

FOREWORD

Viewed in historical perspective, the Kentucky high school today reveals significant growth and strong evidence of an emerging readiness of all schools to serve all the needs of all the youth in the years ahead. The purpose of the twentieth annual report on holding power and whereabouts of Kentucky high school graduates is to document selected aspects of this change. The annual replication of this report has helped to provide objective measures of the growth and development of the secondary school. It is one of many tangible evidences of the contribution of a sound Foundation Program for Kentucky schools.

The comparative analysis of the data relating to the class of 1975 in terms of the class of 1963 reveals significant improvements in the twelve year span. Generally increases in holding power continue to reflect more effective school organization, quality staffing, and improved educational opportunity. It is a tribute to local leadership that increased holding power has been the mainstay of growth of school enrollment and graduates during the period of declining births. The accomodation of record elementary and secondary enrollment during the decade of the Sixties is only a part of the true measure of gains in education under the State's Foundation Program.

It is hoped that this bulletin will be helpful to persons interested in interpreting Kentucky education's many facets of growth and in particular those individuals who are responsible for the development of educational policy and practice. A truly eventful period of advancement lies before the profession and the public as Kentucky celebrates the nation's Bicentennial Anniversary this year.

James D. Graham

ACKNOWLEDGMENTS

A generous amount of credit for this twentieth report of a continuing series on holding power and whereabouts of graduates should go to the high school principals of Kentucky and the several divisions in the Department of Education that collect and report pupil data. Special recognition is due the Division of Computer Services for the continued development of an instant data retrieval system and the sharing of early preliminary reports from the school districts. The problems of Statistical Services in providing accurate and complete data for this report on graduates were multiplied as a result of aggregating school data and reporting by school district only.

Special acknowledgment is also extended to the Division of Pupil Personnel Attendance and Accounting and the Division of Statistical Services. Reports from these divisions each year make possible the consolidation and verification of much common pupil data submitted in separate reports and on different reporting schedules.

Finally, special thanks go to Research Office staff member Brenda O'Brien who assumed major responsibility for collecting and verifying data, and organizing and typing the report.

INTRODUCTION

The twentieth annual report in the series of bulletins on Holding Power and Graduates of Kentucky High Schools starting in 1956 has the enlarged purpose each year of providing an overview of a decade of growth (1963-1975) in addition to presenting the usual analysis of data for the current graduating class of 1975.

In retrospect, the 1963-64 school year marked the beginning of the fourth year of a new era in public education in Kentucky with a record-breaking appropriation made possible by revenue from the enactment of a sales tax. While there are many dimensions of a comprehensive state-local-federal financing plan for providing full educational opportunity, it is generally agreed that the ultimate criterion of adequacy of any plan is the quality and quantity of educational outcomes made possible through its operation. The Class of 1975 is the fourth graduating class having full advantage of a twelve year program under a fully-financed Foundation Program.

Using the fourth year of the decade of the Sixties as base line data and the graduate output for current year (1975), following comparisons point up for selected measures the twelve-year growth and expansion of the high school program in Kentucky.

The increase in the number of all high school graduates for the Class of 1975 as compared to the Class of 1963 is 18,112 or 64.4 percent.

The increase in births in the corresponding years 1957 and 1958 (Class of 1975) as compared to 1945 and 1946 (Class of 1963) was 2,236 or 3.1 percent.

The increase of graduates in the Class of 1975 over the Class of 1963 directly attributed to increased holding power, is 3,608 or approximately one of ten graduates in the class of 1975.

A comparison of whereabouts of graduates of all Kentucky high schools, 1963 and 1975, reveals the following changes in a twelve-year span in the standard categories for which principals provide data:[1]

	1963	1975	Change	% Change
College or University	10,860	18,786	+7,926	+73.0
Trade, Technical, or Nursing School	1,612	3,243	+ 716	+28.3
Business School	915			
Sales or Office	3,267			
Farming	1,115	13,130	+6,122	+87.4
Factory or Trade	2,626			
Other Employment Including Military	2,135	1,414	- 721	-33.8
Not Employed or at Home	3,934	3,318	- 616	-15.7
Unknown	1,676	3,789	+2,113	+126.1
Other	--	2,572	+2,572	--
Total	28,140	46,252	+18,112	+64.4

In the Fall of 1963, 13,387 or 47.6 percent of June graduates were reported entering a formal program of education beyond the high school. Twelve years later, principals reported 22,029 or 47.6 percent of the 1975 graduates enrolled in a post-secondary program -- college or university, trade, technical, nursing school or business school. A graphic portrayal of the growth pattern is shown on the following facing pages.

1. Revision of Principals' Annual Report in 1966 resulted in changes in categories reported on by principals which limit the comparibility of items to broad approximations except for "college or university."

Holding Power and Graduates

Kentucky Public and Non-Public High Schools

Source and Interpretation of Data

There are two primary sources of data on public high school graduates; the principal's annual report and the superintendent's end-of-year report. Statistical data on number of graduates in the principal's report in October may vary from end-of-year enrollment data in the statistical report of the superintendent submitted at the close of the school year on June 30. The data for graduates of public school districts are published in the Biennial Report of the State Superintendent of Public Instruction. The latter report includes graduates of public school districts only whereas this report accounts for all graduates of public and non-public high schools in the state.

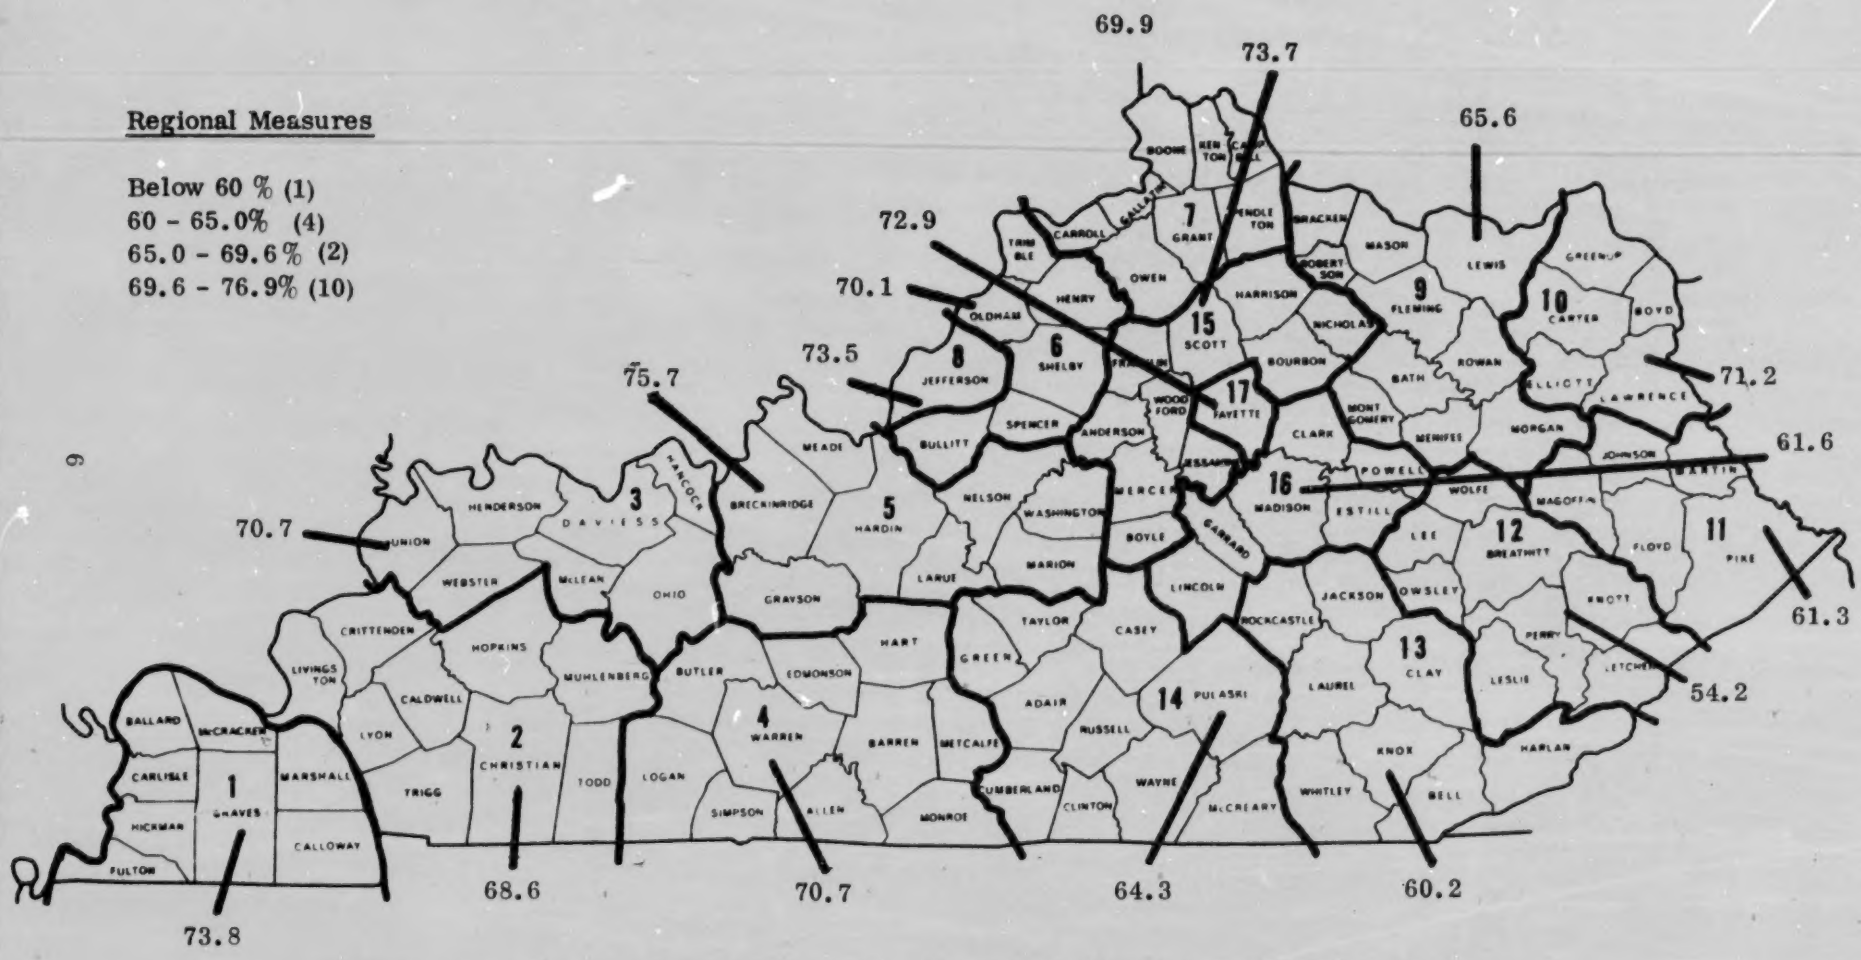
A further precaution is necessary in distinguishing between "holding power" as defined in this report and school dropouts. The method of determining retention rates follows the national pattern. In this bulletin series, rates for the ninth grade through high school graduation are based on enrollments in successive grades in successive years of all public and non-public schools. The data at hand limit the base year to the ninth grade. State data are taken from Kentucky High Schools, annual publication prepared by the Bureau of Instruction.

Reporting the Data

Tables 1 and 2 on preceding facing page portrays the rapid growth of secondary education in the Sixties. The Highlights section provides a brief summary of tabular data and comparisons with state and national norms.

Part I presents current data on holding power and graduates of public and non-public schools in Tables 1 thru 3. Trends and related data are shown in Part II. A special section of Part II deals with a comparison of the relationships of the number and size of public school graduating classes in 1962-63 with the current year, 1974-75. A comparable summary is provided for non-public high schools.

Regional Measure of Holding Power



Map-Chart: Ninth Grade Public Enrollment (1971-72) Completing High School (1975)

HIGHLIGHTS

In 1974-75, from the 321 complete high schools (including six regional and federal high schools), there were 42,975 graduates, or 68.4 percent of the total number of 62,822 ninth grade enrollment in 1971-72. Of the total graduates, 21,258 or 49.5 percent were boys and 21,717 or 50.5 percent were girls.

From the 59 non-public high schools, there were 3,277 graduates or 83.4 percent of the total number of 3,930 ninth grade enrollment in 1971-72. Of the total graduates, 1,643 or 50.0 percent were boys and 1,634 or 50.0 percent were girls.

From the total public and non-public high schools, there were 46,252 graduates, or 69.3 percent of the total number of ninth grade pupils enrolled in 1971-72. Of the total graduates, 22,901 or 49.5 percent were boys and 23,351 or 50.5 percent were girls.

Of the graduates of public high schools, there were 16,727 or 38.9 percent reported as enrolling in college or university. Of this number, 8,056 or 48.2 percent were boys and 8,671 or 51.8 percent were girls.

There were 2,059 graduates, or 62.8 percent of the total graduates of non-public high schools, reported enrolling in college or university. Of this number, 1,086 or 52.7 percent were boys and 973 or 47.3 percent were girls.

From all high schools, there were 18,786 graduates, or 40.6 percent of the total number of 46,252 graduates, reported enrolling in college or university, Fall 1975.

Reported enrolling in some type of formal education program beyond the high school including trade or special school were: public school graduates, 19,788 or 46.1 percent of total public graduates; non-public high schools, 2,241 or 68.4 percent; and for all high schools, 22,029 or 47.6 percent of total graduates.

The average survival rate per 1,000 ninth grade enrollment (1971-72) for all high schools was: tenth grade, 915, eleventh grade, 804; twelfth grade, 714; and graduates 693.

Sixty-nine point 3 (69.3) percent of the total ninth grade enrollment four years earlier completed high school in 1974-75.

For all Kentucky high schools, 40.6 percent of all graduates in June, 1975 were reported enrolling in college or university in the Fall of 1974.

For all Kentucky high schools, 281 per 1,000 ninth grade pupils completed high school and enrolled in college or university.

Age of Public High School Graduates

Wide variability in age of public high school graduates in 1963 and earlier years as compared to 1975 has been reduced as shown by the lower and upper extremes of the age distribution for 1963 and 1975.

In 1963, 87.6 percent of the 24,889 graduates were at ages 17 and 18. Of this number, 38.2 percent of girls and 31.7 percent of boys were graduated at age 17. Graduating at age 16 or under were 310 girls (2.5 percent) and 169 boys (1.4 percent).

In 1975, ages 17 and 18 were more heavily favored as the normal ages for boys and girls as these brackets climbed to 90.3 percent--41.6 percent, age 17 and 48.7 percent, age 18. The number of graduates at age 16 or under was reduced to 109 boys (.5 percent) and 258 girls (1.2 percent) as compared to 1963 with 169 boys (1.4 percent) and 310 girls (2.5 percent).

In 1963, 83.1 percent of boys and 91.0 percent girls had completed high school by age 18. In 1975, these percentages had increased to 88.5 percent for boys and 93.7 percent for girls.

What about the holding power of Kentucky high schools for boys and girls graduating beyond age 18?

In 1963, 1,983 boys or 16.9 percent of total graduates, continued in school beyond age 18 to graduate. Comparable data reveal that 1,115 girls, or 9.0 percent of total, remained in school beyond age 18 to graduate.

With higher rates of graduation at 18 and below, comparative data on graduation experience beyond age 18 reveal an increase in number of students over 18 staying in school:

(1) Boys--2,384 of 20,685 graduates, 11.5 percent.
(2) Girls--2,365 of 21,683 graduates, 6.3 percent.

Summary Graduation Experience Beyond Age 18

	Boys				Girls			
	1963		1975		1963			
Age	No.	%	No.	%	No.	%	No.	%

	1,983	16.9	2,384	11.5	1,115	9.0	1,365	6.3

PART I

HOLDING POWER AND GRADUATES

The three basic tables in Part I provide a comprehensive overview of the number and whereabouts of graduates of all Kentucky public and non-public high schools, separately and combined, for the school year 1974-75. The 66,752 ninth grade public and non-public high school students in 1971-72 were enrolled in 348 complete high schools, 57 junior high schools, and 6 incomplete high schools. Of the total number of entering ninth grade students, 46,252 or 69.3 percent were graduated from 321 complete high schools in 1975. The distribution of all Kentucky high schools in 1972 and 1975 by type of organization and control is shown in the following summary:

Type of Organization	Type of Control									
	County District		Independent District		Private & Parochial		State, Fed. & Regional		Total	
	74-5	71-2	74-5	71-2	74-5	71-2	74-5	71-2	74-5	71-2

Source of Data: State Bulletin Series, Kentucky High Schools, Vol. XL (July, 1972), and Vol. XLIII (August, 1975), Kentucky Department of Education.

Table 1-A presents data by school district, county, and region for 42,975 public high school graduates representing 273 high schools in county and independent districts and six special high schools. A further grouping of public school data by 17 Educational Development Regions (EDRs) is shown in Table 1-B.

Comparable analysis and reporting of non-public high school data by county and region are presented in Tables 2-A and 2-B.

Table 4 provides a comprehensive overview by county and region of total ninth grade enrollment, all public and non-public graduates, and total graduates to college as reported by principals to the Bureau of Instruction. A special feature of Table 3 is the survival ratio of ninth grade per 1,000 enrolling in college and its general implications for curriculum development.

PART II

TRENDS: HOLDING POWER AND RELATED DATA

The brief trends data on holding power and graduates in this section, even of short duration, provide useful benchmarks for appraising extent and rate of change in secondary education in Kentucky. Though limited to measures of quantity only, the data provide important indices to aid in high school program evaluation and as a base for further curriculum study.

Indication of Holding Power

As a general measure of holding power, Tables 4, 5, and 6 provide a concise summary of the ten graduating classes of public, non-public, and combined high schools from 1966 to 1975. The majority of graduates of 1975 were enrolled in the first grade in the school year 1963-64 -- eighth year of the Foundation Program Law of 1956.

Table 4 presents statewide data for public school districts on survival rates and whereabouts of graduates of public high schools for ten graduating classes, 1966-1975 inclusive. Corresponding data for non-public high schools are presented in Table 5.

Table 6 shows the combined data for all high schools and provides, in terms of enrollment and holding power, a measure of the growth of the total secondary program in Kentucky.

TABLE 4

SUMMARY OF WHEREABOUTS OF GRADUATES OF KENTUCKY PUBLIC HIGH SCHOOLS AND THE SURVIVAL RATE BY CLASSES (GRADES 9-12) FOR THE TEN-YEAR PERIOD, 1966-1975

	Class of 1966		Class of 1967		Class of 1968		Class of 1969		Class of 1970	
	No.	%	No.	%	No.	%	No.	%	No.	%
Attending College or Univ.	15,481	43.5	15,352	42.7	16,171	44.6	16,504	43.2	15,809	41.3
